

## Editorial Preface

We would like to present, with great pleasure, the inaugural volume of a new scholarly journal, Journal of Advanced Research in Computing and Applications. This journal is a peer reviewed journal offers an open forum and research reports in the field of computer science and engineering to promote the exchange of research ideas, knowledge and experiences, implementations and results.

Journal of Advanced Research in Computing and Applications focuses on original high-quality research and so to provide a platform for researchers, engineers, academicians as well as industrial professionals from all over the world to present their summary of current research in the gamut of fundamental and applied science. The mission of this journal is to publish original contributions in Computing and Applications in order to stimulate further research and knowledge amongst its scholars.

Scope of the journal includes: emerging computer and information technologies including embedded computing, green computing, smart and intelligent computing, ubiquitous computing, convergence computing, wireless network computing, information and computer related security applications and more.

It is our hope that this fine collection of research reports will be a valuable resource for Journal of Advanced Research in Computing and Applications readers and therefore sincerely invites the submission of technical manuscripts on all the areas of computer science and engineering fields.
