

Editorial Preface

We would like to present, with great pleasure, the inaugural volume of a new scholarly journal, Journal of Advanced Research Design. This journal offers overall strategy that researchers choose to integrate the different components of the research in a coherent and logical way, thereby, ensuring effectively address the research problem; it constitutes the blueprint for the collection, measurement, and analysis of data spanning the interdisciplinary field of applied researches. Scope of the journal includes: biology, chemistry, physics, environmental, business and economics, finance, mathematics and statistics, geology, engineering, computer science, social sciences, natural and technological sciences, linguistics, medicine, and architecture.

Journal of Advanced Research Design focuses on original high-quality research design and so to provide a platform for researchers, engineers, academicians as well as industrial professionals from all over the world to present their research design and preliminary research results in the gamut of applied sciences.

It is our hope that this fine collection of research design will be a valuable resource for Journal of Advanced Research Design readers and will stimulate further research into the wide area of applied science.
